

ServSwitch™ Freedom

## Fast, easy switching simply by moving a mouse

Work more efficiently and clear up desktop clutter with the ServSwitch Freedom.

- » Provides fast, seamless control of up to four CPUs.
- » Exclusive Glide and Switch technology enables users to quickly switch between four workstations with only one mouse and keyboard.

## ServSwitch Freedom

Control four CPUs with one mouse.

- Ideal for traders' desks and for command and control centers.
- Makes for speedy switching between monitors from a trade floor.
- A flexible, 4-port professional-grade switch for simplifying USB keyboard/mouse access to multiple computers.
- Switch ports by moving your mouse from monitor to monitor.
- Enables a single user to switch between four monitors and attached CPUs, and share USB peripherals between them.
- Features two independent USB 2.0 channels for switching between high-speed USB 2.0 peripherals.
- Supports "quick-fire" switching via hotkeys and/or front-panel switching, as well as moving the mouse.
- Features stereo audio.
- No software installed on CPUs.

The ServSwitch™ Freedom enables a single USB keyboard/mouse user to easily access information and control operations across four USB computer systems and four monitors, saving time and money.

With the ServSwitch Freedom and its exclusive Glide and Switch technology, you can perform functions that ordinarily would require four separate keyboard/mouse sets—freeing up valuable desktop space and simplifying your work. The Freedom works similar to an extended desktop on a single computer. Instead, you have four

*Switching ports with the ServSwitch Freedom is as simple as moving your mouse cursor over the connected monitors' X and Y borders. You can also use "quick-fire" hotkey or front-panel switching*

PCs, and all you need to do is configure your screen layout. Switching ports is as simple as moving your mouse cursor over the screens' X and Y borders.

It's ideal for professionals in command and control applications, and those in finance on a trading room floor. Not only can users switch between several computers just by moving the mouse, but they can also simultaneously access a mix of USB peripherals, including high-speed USB 2.0 devices.

When properly configured, the switch has two switched USB Type A ports for the USB 2.0 peripheral connectivity, in addition to its four USB Type B ports for computer channels and two USB Type A ports for USB keyboard/mouse connections.

The keyboard/mouse, audio, and the two

individual USB channels can be collectively or separately switched with Glide and Switch to each computer system. You can, for instance, create e-mails on one system, listen to audio on a second system, print from a third computer, and scan documents on another—all at the same time.

Even better, there's no need to install any software on the connected computers, so setup is simplified and you won't create any security issues in the process—a real concern in government, healthcare, and banking environments.

In addition, the ServSwitch Freedom works with all known software and operating systems, including Windows®, Linux®, Mac®, Sun™, UNIX®, and NetWare® systems.

# ServSwitch Freedom

## TECH SPECS

**Hardware Compatibility** — All computers with USB interfaces

**User Controls** — (1) Computer button to change computer channels; (1) Mode button to determine which peripherals are switched

**CE Approval** — Yes

**RoHS** — Yes

**Connectors** — CPU/server side:

(4) computer channels, each with (1) USB Type B, (1) 3.5-mm stereo audio jack;

User console: (2) USB Type A (keyboard/mouse), (1) 3.5-mm stereo audio jack;

User console switched USB: (2) USB 2.0 Type A (emulated USB for HID devices; supports USB 2.0 devices in low-, full-, and high-speed modes); RS-232 control/flash upgrade: (1) RJ-45 (modular 10P10C)

**Power** — External: Input: 100–240 VAC, 50–60 Hz, autosensing;

Output: 5 VDC, 2.5 amps

**Size** — 1.6"H x 9.1"W x 3.4"D (4.1 x 23 x 8.6 cm)

**Weight** — 1.75 lb. (0.8 kg)
