 **BLACK BOX**

Visual Technology Solutions

Black Box has an extensive line of visual technology products, specifically digital signage players, video wall controllers, video extenders, and video matrix solutions to solve your customers' multimedia needs.

Digital Signage

iCOMPEL® V Series Digital Signage 4-Zone Subscribers

Most affordable line of digital signage players. Ideal for cost-sensitive and space-restricted applications.

- Ultra slim profile.
- Set up screen layouts containing up to four zones for display (higher-end models offer unlimited zones).
- Sets up fast with all software preinstalled.

iCOMPEL Content Commander

Multuser, multichannel content management system for iCOMPEL networked digital signage system.

- Multiple screen formats to design content.
- Automate playlists with flexible scheduling.
- Distribute content with several content channels, simultaneous publishing, and more.

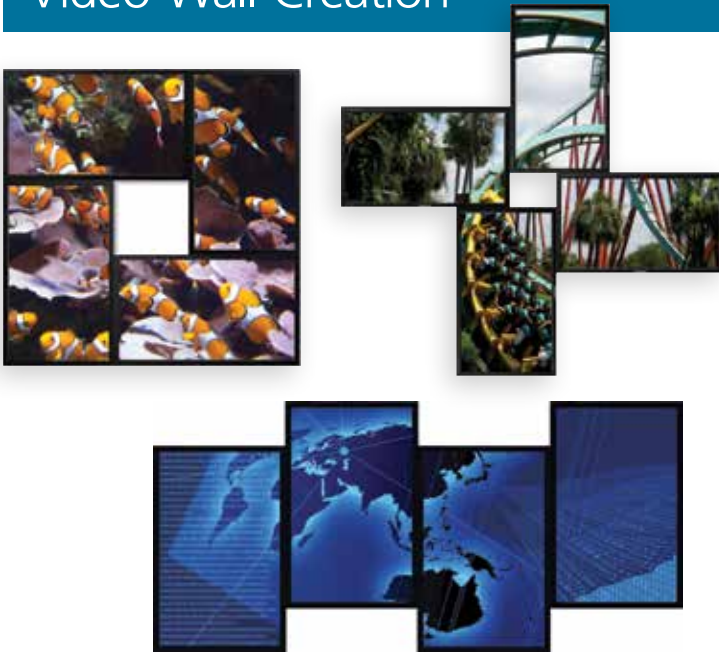

And more!

Publisher and media players available in six different series (P for premium, S for standard, O for OPS slot plug in, Q for quiet/fanless, K for kiosk, and V for value line), with the series differing mainly in their processing speeds, storage capabilities, video zones supported, and their role in a signage application.

More info at: www.black-box.eu/iCOMPEL

Video Wall Creation

VideoPlex4™

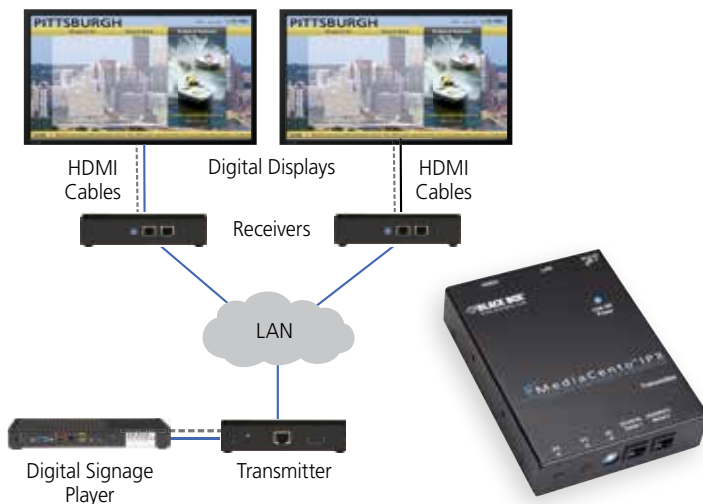

Control and scale video across four displays of any size and resolution to create eye-catching video walls.

- Freely scale and position video sources, including rotations.
- Enlarge video across several screens. The system compensates for gaps between displays so proportions are preserved.
- Control with ease. Setup can be done from software loaded on a PC connected via USB.

HDMI-over-IP Distribution, Video Wall Control & Matrix Switching

MediaCentro IPX™

Everything your customer needs to send HDMI video over IP.

- Simple to install and configure.
- Flexible system enables you to start small and expand up to 100s of screens without limitation..
- Save on cabling costs. The system leverages your existing infrastructure.
- The kit is a pre-configured system for easy video distribution over a network including LAN switch, cables, one transmitter, and 2, 4 or, 8 receivers.

MediaCentro IPX™ Controller

Enables IP-based video matrix switching and video wall control for HDMI-over-IP solutions.

- Switch from any source to any display.
- Create presets and combine multiple receivers into a video wall.
- Control and switch video wall zones remotely.
- Mobile support.
- Eliminates the need for expensive video matrix control systems.
