DELIVER THE RIGHT MESSAGE AT THE RIGHT TIME

EASY TO USE DIGITAL SIGNAGE PLATFORM FOR VIBRANT, REAL-TIME DISPLAYS

iCOMPEL is an award-winning, sophisticated, but easy-to-use digital signage solution for networked signage. Users enjoy features like touch interactivity, HTML5 support, transitions, transparency, localised customisation and streaming video. Plus, this multilingual digital signage content management system scales from one to thousands of players.

Best of all, iCOMPEL is an appliance based solution that comes with all software pre-installed, free updates and no ongoing subscription or licensing fees. Users can install iCOMPEL publishers and subscribers on a network and manage them via a browser from any PC, Mac® or on a LAN or WAN. The drag-and-drop layout editor makes it easy to generate multimedia layouts and the scheduling functionality ensures users get their message to their target audience at the right time.

FLEXIBILITY
Gives you the flexibility to create attention getting digital signage without a lot of creative or technical know-how.

SCALABILITY
Scalable from a simple one screen solution to a large global enterprise solution with thousands of screens interconnected via a network.

LOW COST OF OWNERSHIP
Affordable one-time investment with zero ongoing fees or subscriptions.

EASY DEPLOYMENT
Quick setup for beginners or those with more technical experience. Easy to integrate and won't cause IT or security headaches.

INTUITIVE INTERFACE
Provides a number of layout templates and makes signage design simple with its publishing tools.

HIGH RESOLUTION
Supports up to 4K resolution for crisp, eye-catching digital signage.
